FERN AND FLOWER FARM, INC.

NATIVE

PLANTS

1878 - 1935

Natural planting of the Ostrich Fern

GENERAL INFORMATION

SHIPPING INSTRUCTIONS—Our shipping season opens about April 1st. Customers are requested to state how stock is to be shipped. In case no instructions are furnished by a customer, we will exercise our best judgment, but will not be responsible for damage to stock which may result from long transit.

CLAIMS—No claims will be entertained unless made within 10 days of receipt of goods. When shipments are injured by delays in transit, claims should at once be made against transportation company by consignee.

PRICES—The prices in this list include packing and delivery to the local express or freight station. In the case of Broadleaved Evergreens and Azaleas, where they are shipped with balls of earth, the price includes careful digging and burlapping. Packing will be charged for in addition, at cost, for Wholesale Trade.

When Bulbs or Ferns are ordered in small quantities they can be delivered by parcel post and an extra charge of 10% of the cost of the plants should be added to cover delivery charges East of the Mississippi River and 20% on orders to points West of the Mississippi River.

Five of any one variety and size will be sold at the 10 rate. Thirty or more of any one variety, at the 100 rate.

A discount of 2% will be given when remittance accompanies the order. All unknown Parties should send remittance with order.

All shipments will be accompanied by Certificates of Inspection, both Federal and State.

KEY TO AID SELECTION OF PLANTS FOR SPECIAL PLACES

- A—Indicates Plants desirable for Dark, Shady Places.
- B—Indicates Plants desirable for Low, Wet Places.
- C—Indicates Plants desirable for Open, Sunny Places.
- D—Indicates Plants desirable for Dry, rather Open Woods.
- *—Indicates Plants desirable for Rock Gardens.

Two or more of the Signs against the same Plant means that the Plant does equally well in the several positions.

HOW TO REACH OUR NURSERIES

Our nurseries are located at Southwick, Mass. The New College Highway, extending from Northampton to New Haven, passes our nurseries, making them easily reached by automobile from all directions. Visitors are always welcome.

GILLET FERN AND FLOWER FARM, INC.

SOUTHWICK, MASS.

HARDY FERNS

Hardy Ferns are being used in quantity for massed plantings, and selections can be made to suit almost any location. Such places as corners about the house where the sun doesn't strike can be beautified by the use of Hardy Ferns. There are a few varieties which will thrive in open sun, yet, for the most part, they will give much better results planted in a shady location.

Hardy Ferns can be planted in either the spring or fall. Care should be taken in not planting them too deep. Those varieties with a crown, plant level with the surface, while those growing from underground root stalks, plant just below the surface. Ferns thrive in a light and porous soil with a goodly amount of leaf-mold.

VARIETIES

		Each	Per 10	Per 100			Each	Per 10	Per 100
(A)	<i>Adiantum pedatum</i> (Maidenhair Fern)	\$0.25	\$1.50	\$12.00	(A)	<i>Dryopteris Goldieanum</i> (Goldie's Wood Fern)	\$0.35	\$3.00	\$25.00

COLLECTIONS OF HARDY FERNS BOUND TO PLEASE LOVERS OF WILD FLOWERS

The following collections are made up to help in selecting for special needs, and should be sent by express or freight.

No. 1, \$5. For Open Sun Culture

This collection is desirable for the open border, and all the Ferns being rather tall, can be grown as single specimens or for massing, with or without flowers.

5 *Athyrium filixfemina*, 2-3 ft.

20 *Dennstedtia punctilobula*, 1-2 ft.

5 *Osmunda claytoniana*, 2-3 ft.

5 *Pteretis nodulosa*, 2-4 ft.

No. 2, \$5. For Dry, Shady Places

These Ferns will grow in a dry, shady place. Plant them where flowers, as a rule, do not thrive.

10 *Dennstedtia punctilobula*, 1-2 ft.

10 *Dryopteris marginalis*, 1-2 ft.

5 *Osmunda claytoniana*, 2-3 ft.

10 *Polystichum acrostichoides*, 1 ft.

Collection Number 5

No. 3, \$6. For Moist, Shady Places

This collection is fine and easily handled in moist, shady places; also for large rockery.

5 *Adiantum pedatum*, 1 ft. 5 *Dryopteris marginalis*, 1-2 ft.
 5 *Athyrium filixfemina*, 2-3 ft. 5 *Dryopteris spinulosa*, 1-1½ ft.
 5 *Athyrium thelypteroides*, 2-3 ft. 5 *Polystichum Acrostichoides*,
 5 *Dryopteris cristata*, 1 ft. 1 ft.
 5 *Dryopteris hexagonoptera*, 1 ft. 5 *Woodwardia virginica*, 2 ft.

No. 4, \$5. For Wet, Open Ground

These Ferns are very useful for border of a lake or low, wet ground.

10 *Dryopteris thelypteris*, 1 ft. 10 *Osmunda regalis*, 2-3 ft.
 10 *Onoclea sensibilis*, 1 ft. 10 *Woodwardia virginica*, 2 ft.

No. 5, \$6. Low Evergreen Ferns for Dry, Rocky Ledge

10 *Asplenium platyneuron*, 6-15" 10 *Polypodium vulgare*, 4-10"
 10 *Asplenium trichomanes*, 3-6" 5 *Woodsia obtusa*, 6-12"
 10 *Camptosorus rhizophyllus*, 4-9"

HARDY PERENNIALS

Many of the varieties you find listed below are native plants. There is no class of plants which gives the same permanency of effect as do these. When established they bloom year after year, while many of the so-called hardy plants pass their period of usefulness after two or three years.

VARIETIES

		Each	Per 10	Per 100

Trillium grandiflorum

May we help you with your garden plans?
We will gladly share our years of experience with you if you will drop us a line.

Viola canadensis

BOG PLANTS AND NATIVE ORCHIDS

To the group of plants which can be conveniently classed as Bog Plants belong some of the most interesting varieties of our American flora. These require a damp situation in which the moisture must be constant yet not excessive.

Caltha palustris

Native Orchids can be successfully grown under the right conditions. The *Cypripedium acaule* should be planted

where the soil is very light, composed chiefly of sand and where the drainage is exceptionally good, and should always be planted in the shade. The *Cypripedium spectabile* requires boggy conditions where there is constant moisture. The

Cypripedium pubescens will grow either under boggy conditions or in a rich wood soil in the shade.

VARIETIES

ARTIFICIAL BOG GARDEN

In a Bog Garden the amount of moisture present may not be excessive, yet it must be constant. If one does not have the natural conditions for growing this interesting group of plants, an Artificial Bog Garden can be constructed.

To construct an Artificial Bog Garden, excavate to a depth of $2\frac{1}{2}$ or 3 feet, or below the frost line. A retaining basin should be made of clay or cement, something that will hold the water. If cement is used, it should be painted to prevent the lime in the cement from working into the soil, as Bog Plants will not thrive in the presence of lime.

Make an outlet about 8 or 9 inches from the surface and fill up to this point with a layer of crushed rock or coarse gravel. This coarse fill will keep the water table at a constant level. On top of this material place a layer of rich wood dirt or acid humus up to the level of the surrounding ground. The supply of water may be either natural or artificial. If artificial, pipe the supply of water into the coarse fill. The water will find its way to the surface in sufficient quantities to successfully grow most Bog Plants.

Cypripedium pubescens

Cypripedium acaule

Native Orchids are universally admired. These beautiful gems of our woodland can, in the majority of cases, be successfully grown. Let us brighten a corner of your Woodland Garden with some of these interesting and beautiful Native Plants.

EVERGREEN SHRUBS
NATIVE RHODODENDRONS

All members of the Heath family, including Broad-leaved Evergreens and Azaleas, require a soil showing an acid reaction. Leaf-mold is very beneficial to the growth of these plants and produces a strong acid reaction and leaves the soil porous, admitting air and affording good drainage.

For permanent and substantial plantings in shaded places, nothing surpasses our Native Broad-leaved Evergreens. Native Rhododendrons and Azaleas combine to give a naturalistic planting that luxuriance which is hard to describe. Our stock is of the finest quality and is grown in our Nursery from cut-back clumps. The prices listed are f. o. b. Southwick and include packing charges.

VARIETIES

	Each	Per 10	Per 100
Calluna vulgaris (Heather)			
6-9 in.	\$0.75	\$6.00	\$50.00

A shady nook, a few rocks, wild flowers and ferns—a bit of paradise on earth. That woodland spirit you adore will move to your home grounds with the children of the woods. Those Bloodroot and Lady's Slippers, Bluebells and Trilliums at your doorstep, enhanced with a background of America's finest floral display of native Rhododendrons and Azaleas, will create a unique atmosphere not to be attained with the more pretentious flowers of civilization. Ours is one of the most unique Nurseries in the Country. We specialize in native plant gems, Nature's own contribution to making this a brighter, better world. For fifty-seven years the founders of this business preached the gospel of naturalistic gardening.
